SMEs run on **paper, Excel,** **and WhatsApp.**

Many small and mid-sized businesses still manage daily operations manually — and the available software does not match their real workflows.

PROBLEM 01

Manual operations

Time and accuracy lost to paper, notebooks, Excel, and WhatsApp for daily work.

PROBLEM 02

Expensive software

Existing systems are priced for enterprise — too costly for small and mid-sized businesses.

PROBLEM 03

Rigid systems

Most platforms force one fixed process — even when businesses operate differently.

PROBLEM 04

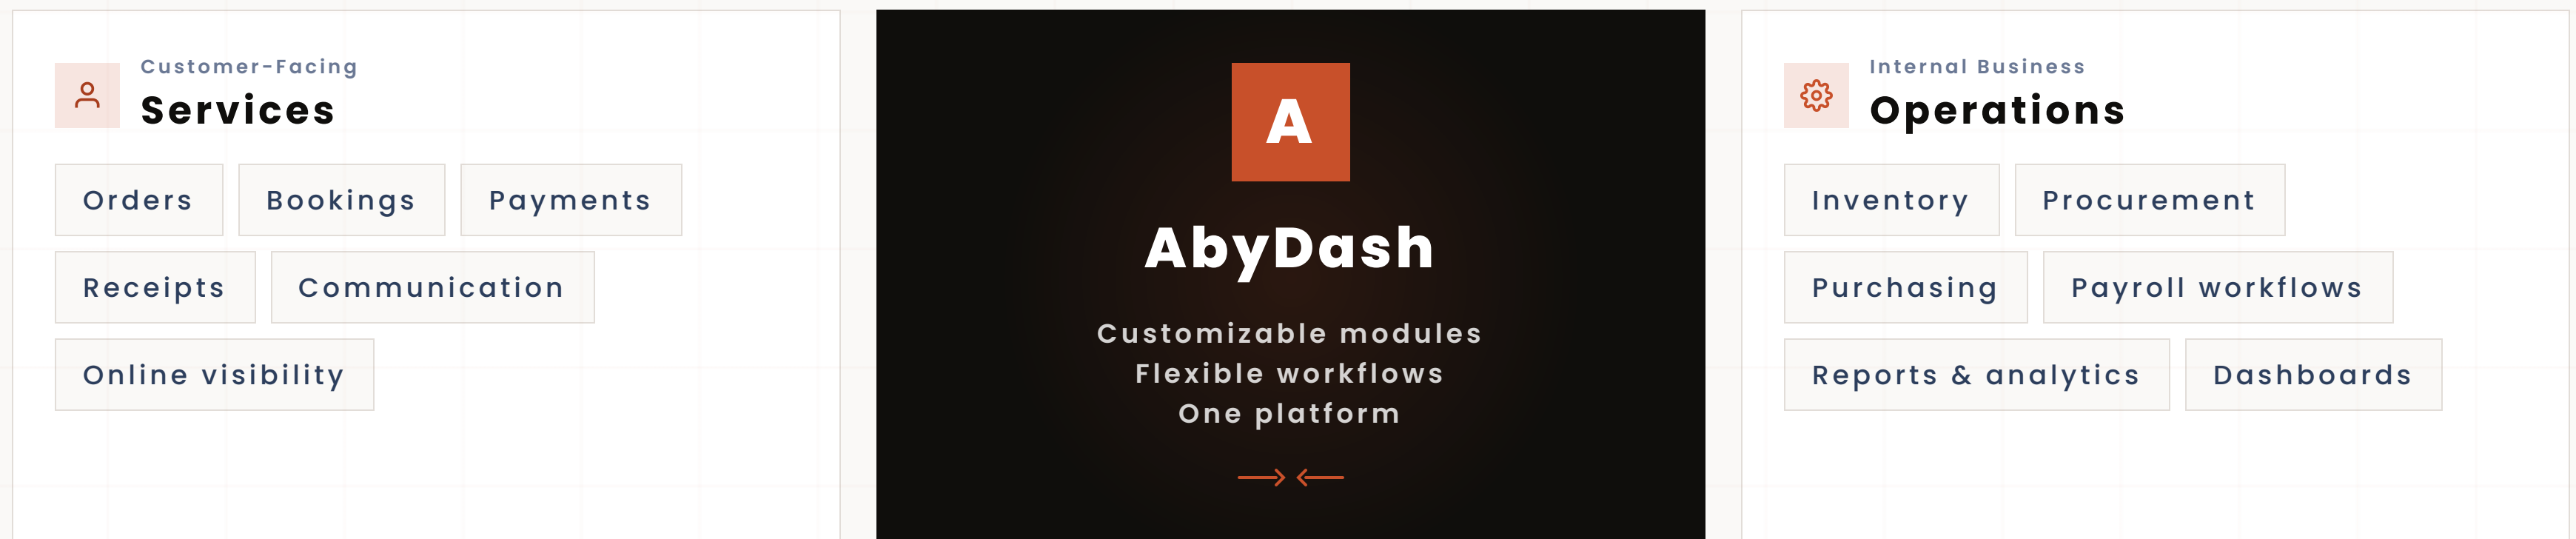

Scattered tools

Software solves one piece — the rest of operations stays manual and disconnected.

SMEs need affordable software that fits how they actually work.

One platform. Built **around** your business.

AbyDash combines customer-facing services and internal operations — and every business chooses the modules and workflows it needs.

Live Now
● **Working MVP Prototype**

Functional business dashboards, service management, booking workflows, and company-side operations features.

Start with real businesses. Scale from proven results.

Target categories — businesses where AbyDash creates immediate operational value:

• Restaurants & Lounges

• Hardware Shops · Quincailleries

• Stationery Shops · Papeteries

• Hotels & Accommodation

• Service Businesses

• Small & Mid-Sized Companies

01

Pilot partners

Work with real businesses and learn their operations.

02

Customize workflows

Adapt modules to each business's real needs.

03

Prove value

Use early results to build trust and case studies.

04

Expand by sector

Move sector to sector with proven playbooks.

05

Build the team

Hire sales, support, and onboarding capacity.

Real partners. Three sectors. Already live.

AbyDash is not just an idea — real businesses across different industries are already engaged with the platform.

Technical Proof

Working MVP Prototype

4 partners · 3 sectors validated

**Hardware · Stationery ·
Hospitality**

Six revenue engines. One scalable business.

AbyDash earns from subscriptions, customization, premium modules, transactions — and advertising as the network grows.

→ Not dependent on one income source — recurring revenue stacks with customization, modules, transactions, and ads.

Built by a **team** that can ship.

Technical development, business strategy, marketing, and customer support — under one execution structure.

Team Lead

MIHIGO Prince Jordan

Team Lead · Business Strategy Lead

Leads the group, coordinates the team, supports business direction, partnerships, and pitch preparation.

ISHIMWE Serge

Lead Developer · Technical Lead

Leads platform development, backend/frontend implementation, technical decisions, and prototype improvement.

Dushimimana Fabrice

Product & Marketing Lead
